

HOW WE CAN HELP

GUIDE

Learning you have breast cancer can be overwhelming. It's difficult to make decisions while you are filled with various emotions. We understand, and we are here to help you through this most difficult time.

We will schedule your initial consultation as soon as possible, typically within 48 hours, with the appropriate specialists. During your first appointment, your oncology team will work with you to develop a personalized and comprehensive treatment plan.

EDUCATE

Our program is designed to empower patients with the knowledge to choose the course of treatment that best fits their needs. Prior to your consultation, we will help you understand what to expect and how to best prepare for the appointment. During your consultation, you will receive in-depth and up-to-date information that will help you make the best decisions about your treatment.

COLLABORATE

Having the best clinical team when you are first diagnosed helps to create the best plan. Northwest Cancer Specialists emphasizes collaborative care by a group of physicians and specialists who work together to develop your individualized treatment plan.

TREAT

The highly qualified medical and radiation oncologists in our program have a special interest and expertise in treating breast cancer patients. We work together to ensure that you get the most timely, in-depth and compassionate care possible.
